

How to find the Instruction for Use corresponding to your Euro Diagnostica product

The Instructions for Use of Euro Diagnostica products are now available to download from our website. Please, follow the instruction below.

On the label of the Euro Diagnostica kit box, a website link is stated in conjunction to the harmonized symbol for "Consult instructions for use":

www.eurodiagnostica.com/productinfo

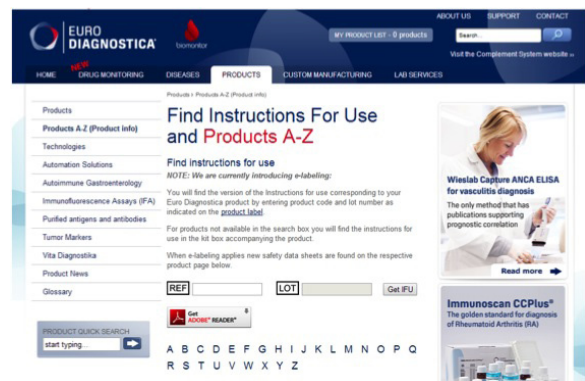

The QR code on the box label also gives you direct access to the website.

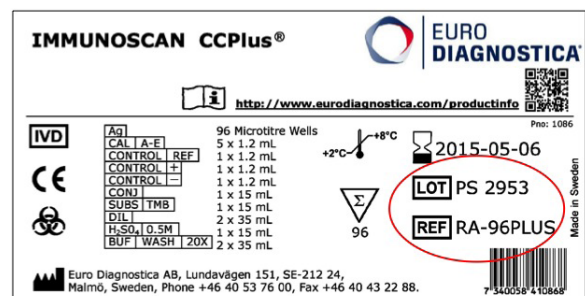

Open your web browser and enter the website link:

www.eurodiagnostica.com/productinfo

You now get access to our IFU search page, placed under Products/Products A-Z (Product info).

To receive the corresponding Instructions for Use to your product, you need to have the REF number (product code) and LOT number of the product. Both numbers are indicated on the kit box label.

Enter the **REF** number in the first field by typing it exactly as indicated on the box label. You will receive a drop down list with product codes that match what you have typed in.

When correct **REF** number is entered, click into the **LOT** number field. Enter the **LOT** number exactly as it is indicated on the box label. You will receive a drop down list with lot numbers that match what you have typed in.

If you do not have Adobe Reader installed on your computer, there is a possibility to download the program on our website.

When you have entered the **REF** number and **LOT** number, click on the button Get IFU.

The corresponding Instructions for Use is shown under Search result.

If you enter the wrong **LOT** number, no search result will be shown.

Click on the link under Search result and the corresponding Instructions for Use will open in a separate window.

The Instructions for Use is possible to print or download.

For products not available in the search box you will find the instructions for use in the kit box accompanying the product.

When e-labeling applies new safety data sheets are found on the respective product page below.
